The Rainbow Gatherings are unique events taking place all over the world. The meaning of the gatherings are to unite people with the same respect and adoration towards nature, love, life and peace. In the gatherings people with the same view of life come together to live and to enjoy the most beautiful things in the world together. Rainbow Gatherings are open to all people with love in their hearts and respect towards others. The main event is the Full Moon Celebration. These month long communal events do have their rules which some consider to be quite strict; there are no electronic devices allowed such as mobile phones and cameras.

Last years main Rainbow Gathering took place in Finland, near Leppävirta uniting all nationalities in beautiful scenery of our country. People are interested in these kinds of things, but still shy to participate and the news footage from last years gathering was shot from a helicopter flying by. Everybody was waving and smiling to the helicopters flying by during dinner; just so the public gets to sneak a peek.

Still there are some people granted a permission to photograph the way of living in the gatherings. They do it with respect and Canadian Benoit Paillé is one of them; she presents the people and the culture of The Rainbow Gatherings in a very genuine and beautiful way.

Enjoy!
